

UX & Interaction Design Specification

Information architecture, journeys, usability rules and design system direction.

Cherry • DealFlow • Working Document • Version 1.0 • September 2026

1. UX Principle

The system may be sophisticated internally, but users should see only the complexity needed for their current task.

2. Primary Navigation

Today

Leads

Customers

Properties

Visits

Deals

Documents

Reports

Settings

3. Primary Home

Today's Attention should surface due/overdue follow-ups, visits, new leads, high-priority opportunities, document issues and recommended next actions.

4. Core Journeys

Import data

Create lead

Qualify lead

Capture requirement

Find matching properties

Schedule visit

Record feedback

Create follow-up

Advance deal

Complete documentation

Close opportunity

5. Interaction Rules

Progressive disclosure

Quick add

Bulk actions

Strong search

Clear status and ownership

Consistent empty/error/loading states

Confirmation for destructive/high-risk actions

6. Responsive Design

Core lead/follow-up actions should be practical on desktop and mobile-sized screens.

7. Accessibility

Keyboard support where applicable

Readable hierarchy

Meaning not conveyed by color alone

Clear labels and validation

Accessible focus states

8. UX Governance

New features should reuse existing patterns and components rather than introduce one-off interaction styles.
