

Testing & Quality Assurance Strategy

Quality gates from development through production.

Cherry • DealFlow • Working Document • Version 1.0 • September 2026

1. Test Pyramid

Unit tests
Integration tests
API tests
End-to-end tests
Data migration tests
Security tests
Performance tests where justified

2. Critical Regression Journeys

Import → activate lead
Lead → requirement → match
Follow-up → completion
Visit → feedback → next action
Deal → documents → closure

3. Data Testing

Duplicate detection
Mapping validation
Large import behavior
Partial failure/retry
Rollback/recovery
Historical data preservation

4. Security Testing

Tenant isolation
Authorization bypass attempts
Document access
Input validation
Dependency scanning
Secrets checks

5. Release Quality Gates

Acceptance criteria pass
Automated tests pass
Critical defects resolved
Security impact reviewed
Migration reviewed
Observability present
Rollback/recovery plan confirmed

6. Production Quality

Monitor errors and customer-impacting workflows after release.

Convert recurring defects into regression tests.
