

Customer Onboarding, Support & Success

Operational model for helping customers adopt and retain the product.

Cherry • DealFlow • Working Document • Version 1.0 • September 2026

1. Onboarding

Choose setup model
Import or create initial data
Configure pipeline
Create users/roles
Verify first workflow
Train users on daily attention/follow-up flow

2. Data Migration

Collect source
Map fields
Validate
Preview
Approve
Import
Reconcile counts
Review unresolved records

3. Support Levels

Self-service guidance
Standard support
Priority/incident support
Enterprise support as the customer base matures

4. Success Milestones

First successful import
First lead managed
First follow-up completed
First site visit tracked
First deal managed
Recurring weekly usage

5. Feedback Loop

Support themes feed product discovery.
Repeated manual requests are candidates for productization or automation.

6. Customer Communication

Release notes
Known issues
Maintenance notices

Security notices when applicable

Deprecation notices with adequate transition guidance
