

Product Analytics & Metrics Framework

What to measure and how metrics guide decisions.

Cherry • DealFlow • Working Document • Version 1.0 • September 2026

1. North-Star Concept

Every active opportunity should have an understandable current state and next action.

2. Activation

Data imported
First lead created/activated
First follow-up
First property match
First workflow completion

3. Engagement

Weekly active users
Leads managed
Follow-ups completed
Visits managed
Deals progressed

4. Business Value

Response time
Follow-up completion
Visit conversion
Negotiation progression
Closure rate
Revenue/commission records where available

5. Product Quality

Error rate
Latency
Import failures
Notification failures
Support tickets
Crash/incident rate

6. Retention

Logo retention
User retention
Usage retention
Expansion
Churn reasons

7. Analytics Governance

Collect only what is necessary.

Respect tenant boundaries and privacy.

Document metric definitions so dashboards remain consistent.
