

Architecture Decision Record Governance

How important technical decisions are documented and revisited.

Cherry • DealFlow • Working Document • Version 1.0 • September 2026

1. When an ADR is Required

Major architecture choice
Security boundary
Data model strategy
Integration strategy
Technology choice with long-term consequences
Breaking API/data decision

2. ADR Template

Context
Problem
Options considered
Decision
Rationale
Consequences
Security impact
Migration/rollback impact
Status
Date
Owner

3. Decision Lifecycle

Proposed → Accepted → Superseded/Deprecated where appropriate.

4. Principle

Do not document every trivial implementation detail; document decisions that future engineers need to understand.
